All prints include editing and color correcting

Paper Types and Coatings;

Lustre coating – Environmentally safe, water based coating provides protection and a slightly matte appearance to your prints versus an uncoated print. (fingerprint proof)

Metallic Paper – Opens a whole new dimension for commercial and portrait output. With a glossy finish and metallic appearance, it delivers rich, vibrant colors and flattering flesh tones.

This paper uses a proprietary combination of film laminate layers that produce striking, three-dimensional, lasting images on an ultra-bright background. It can be described as chrome on paper.
